3. HAZARDS IDENTIFICATION

Potential Health Effects

Eye

Eye irritant. Can cause redness.

Skin

Can cause skin irritation. Burns can result from prolonged contact

Swallowing

Low acute oral toxicity. May cause nausea, diarrhea, abdominal cramps.

Inhalation

Inhalation not likely. Mists may cause upper respiratory tract irritation.

4. FIRST AID MEASURES

Eyes

If material gets into the eyes, immediately flush eyes gently with water for at least 15 minutes while holding eyelids apart. Get medical attention.

Skin

In case of contact, immediately wash with plenty of soap and water for at least 5 minutes. Seek medical attention if irritation develops or persists. Remove contaminated clothing and shoes. Clean contaminated clothing and shoes before re-use.

Fire Fighting Instructions

Wear a self-contained breathing apparatus with a full-face piece operated in the positive pressure demand mode with appropriate turn-out gear and chemical resistant personal protective equipment. Refer to the personal protective equipment section of this MSDS.

6. ACCIDENTAL RELEASE MEASURES

Cleanup and disposal of Spills:

Absorb with an inert absorbent. Shovel up into an appropriate closed container. (see Section 7: Handling and storage).

7. HANDLING AND STORAGE

Do not handle unless the safety precautions have been read and understood. Avoid skin and eye contact. Keep containers tightly closed when not in use.

8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Eye Protection

Chemical splash goggles and face shield (8" min.) in compliance with OSHA regulations are advised; however, OSHA regulations also permit other types of safety glasses. (Consult your industrial hygienist).

Skin Protection

Wear impervious gloves (consult your safety equipment supplier). To prevent skin contact, wear impervious clothing and boots.

Respiratory Protections

If workplace exposure limit(s) of product or any component is exceeded (see exposure guidelines), a NIOSH/MSHA approved air supplied respirator is advised in absence of proper environmental control. OSHA regulations also permit other NIOSH/MSHA respirators (negative pressure type) under specified conditions (see your industrial hygienist). Engineering or administrative controls should be implemented to reduce exposure.
